In addition, I will gain the cunning and gain advantage over the intelligence, the charisma and the deliveries of salvation of wisdom. In general, this character leans on the side of the mischief of the arcane cheater. cheater. are a bit more ruthless, with innate spells like infernal reproach and a bonus combo +2 Dexterity / +1 Intelligence. Internal Rebuke (level 3) is an innate 1 a day spell cast as a 2nd level spell, which means that it causes 3d10 fire damage to a failed dexterity bran. Of course, this is only in retaliation for being beaten, but still... Ouch! You will also get resistance to fire damage, as well as thaumaturgy cantrip (level 1) and darkness once a day. The charisma will be the casting skill for these innate spells.Build a rookie with weapons remotelyWhen playing this cheat roll, we must remember all the skills acquired from the basic rookie class and implement those skills as well. Our initial building choices should take into account our style of play, so I'll make sure to use a shortbow as my ambush weapon. In this way, I can use characteristic stealthy characters and magical skills from the beginning.Related Positions:Expertise doubles my Competence Bonus for 2 of my 4 Competent Skills. In general, I will choose Acrobatics, Deception, Research and Stealth. However, I will choose my thieves skills tools along with Stealth like any other rogue I do for higher score. I still want to collect all the locks and disassemble traps as a good rogue should.Sneak Attack is my main combat feature, which gives me more damage when I hit an enemy with an attack roll that has an advantage. In other words, if I can ambush my enemy, I'll get 1d6 extra damage. This damage increases to 2d6 on level 3 and 3d6 on level 5. Even if I don't play this character as some kind of killer, I will have a combat maneuver ready for battle.I will also start with Thieves Cant, a secret language between characters written in strange symbols.When I get to level 2, I learn Acción, which is a great way to prepare my Sneak Attack. Astua action gives me a bonus action for dash, disappoint or hide. Therefore, I can maneuver around the chaos of a battlefield and try an Hide to obtain an advantage over my extra sneak attack. More, iā ē ll be be to run away and use my magic or remote attacks against aggressive opponents.Learn skills Trickster Arcane: Hand Mage Legerdemain +When I reach level 3, my Trickster arcane subclass grants me magic from the magic schools, especially illusion and enchantment. This subclass is built to be a truly magical rogue, mixing elements of both in clever ways.Mage Hand Legerdemain is an important aspect of the arcane trickster you could call them experts in the hands magas. This ability makes the arcane magician's hand invisible to a cheating arcane and includes several benefits.I can store an object in a container used by someone else, i.e. plant evidence or an unpleasant surprise on an enemy.I can retrieve an item from a container used or carried by someone else, steal things.Finally, I can use my thieves Tools remotely, leaving room for booby traps.I can perform these tasks without being noticed if my target fails a Perception (Wis) check against my Sleight of Hand (Dex) check Now, I'm going to put the cheat element in this class. This skill works fine if I'm exploring a dungeon or undercover at a party.Magical Embush gives my enemies a disadvantage against magical attacks made while I'm hidden. With this class, this often means enchanting or deceiving the targets with magical effects. This ambush offers us a lot of creative solutions to solve problems, whether it be by fooling a dangerous enemy or enchanting an NPC.The Versatile Trickster (level 13) uses the cantrip of the magic hand to give me an advantage in the attack rolls. I can throw the magic hand as an extra action. Then, I can pick any enemy within 5 feet of the spectral hand and gain advantage in an attack against them.Spell Thief (level 17) gives me the ability to steal spells from my opponents when they attack me or include me in a area. The launcher must make a saving cast with his spell modifier against my DC Intelligence. In a failed save, I deny the effect against me and I can cast it with one of my spell slots. Level 17Stroke of Luck is my last Pácaro option, making me an automatic blow when I lose. This goes for combat or savings of releases, and I must rest before using it again. Level 20. This offers me a attack and enemy manipulation all in one cantrip.Minor Illusion: Create a sound, a small visual illusion or even a scent to distract opponents or fool NPCs. This utility spell has many creative uses, especially when I'm trying to get the jump over someone.1st level spellsLike my cantrip options, I'm going to have a lot of fun adventure spells built into my level 1 spell options. Therefore, my spell-free choice will be related to combat. Higher level spells will have to come from illusion or from magic schools.Silent Image: Illusion Create an illusory silent object, creature or person not larger than a 15-foot cube. I can move this illusion around the field on my turn. Mostly, I will be creating copies of myself to confuse opponents. Think of Naruto's shadow clones.Charm Person: Charm Charm a target if they fail on a wisdom saving throw. This only works for skills I am proficient at level 11. Insight gives me the ability to feel creatures within 10 feet of me when I am in total darkness.Darkness.
